

DME Training

Focused Digital and Multimedia Evidence Solutions

About our Training Resources

Learn how to quickly and correctly recover precious evidence from DVR surveillance systems through one of our many training opportunities, from free webinars to DVR Examiner certification programs. All classes and webinars are hosted by our professional support technicians and ATS engineers.

DVR Examiner Monthly Webinar

Sign up for this free 1-hour webinar to learn how to use DVR Examiner as efficiently as possible. Hosted once per month.

Free Demo of DVR Examiner

Sign up for a free 1-on-1 DVR Examiner demonstration from a member of our technical support team.

User Training & Certification

This free 2-day training is the official course for DVR Examiner. An optional 1-day certification is also available.

User Training & Certification

DVR Examiner User Training is a two-day course that covers everything you need to make the most of DVR Examiner. This course highlights many of the features and functions in DVR Examiner that will improve your day to day experience working with digital video recorders (DVRs). Following this training course is an optional one-day user certification. Upon completion, attendees become DVR Examiner Certified Users for a two year period.

Train With Our Expert Team

We are committed to assisting you throughout the process of data recovery. When you attend a video recovery training with DME Forensics, you are learning from the same people building and maintaining DVR Examiner.

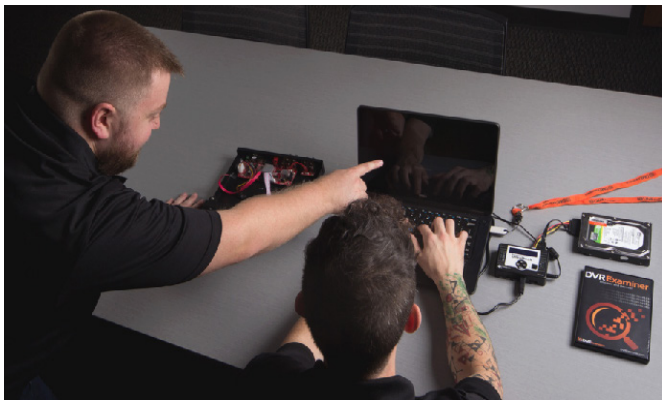

We can't say enough good things about DVR Examiner and the team at DME Forensics. We have attended several of their training courses and have deployed DVR Examiner in our lab. The training courses are fantastic, they are extremely knowledgeable, very responsive, and go the extra mile to assist us when needed. DVR Examiner is a real time saver and easy to use.

Roger Cain, Keith Swanson, & Brewster Rolland-Keith -RMIN

Additional Resources
